

Education

ENTC Engineering 2021-2025

Savitribai Phule Pune University :- 7.6 CGPA

HSC 2020-2021

Yashavantrao Chavan Institute of Science :- 89 %

SSC 2018-2019

Sadhana English Medium School :- 87.90 %

Skills

Programming

Python, Java, SQL, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

Machine Learning

Supervised Learning, Unsupervised Learning, Deep Learning

Libraries & Frameworks

NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow

Data Science & Analytics

Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA)

Soft Skills

Communication, Teamwork, Adaptability, Critical Thinking, Attention to Detail, Creativity

Version Control

Git, GitHub

Achievements

- General Secretary, Student Council, JSPM jscoe Pune, 2024-25
- Solved 200+ LeetCode problems (Data Structures & Algorithms)
- District-level Chess Champion
- 5-star rating on HackerRank in Python, Java, and SQL

Work Experience

TechnoHacks

08/2023 – 09/2023 | Online

Engineered ML models for quality prediction and recommendations using Scikit-learn and Pandas, achieving 97% accuracy.

Projects

Credit Card Fraud Detection

Engineered a fraud detection model using Random Forest, resulting in 98% accuracy and a significant reduction in false positives.

Movie Recommender System

Developed a metadata-based recommendation system using content filtering techniques, enhancing recommendation accuracy by 90%.

Eye Strain Detection

Built a real-time eye strain detection system using facial recognition and eye-tracking, achieving 90% detection accuracy.

Handwritten Digit Classifier without Tf/PyTorch

Engineered a digit classifier using only NumPy and Pandas, achieving 97% accuracy and ensuring optimized computational efficiency.

Linear Regression Models

Constructed simple and multiple linear regression models from scratch using custom-built algorithms, resulting in an R^2 score of 79.07% and low error rates (MSE: 0.1158, RMSE: 0.3403, MAE: 0.2744).
